

Considers Plato To Be Founder Of Catholicism

Heresies And Orthodoxy Attributed To Him

SOCRATES' SUASION
INFLUENCED WORKS

Dr. W. D. Woodhead Claims
Philosopher is Greatest
Prose Writer

"If we had to choose one man as the founder of Catholicism we should have to choose neither St. Paul nor Jesus Christ but Plato." This was the statement of Dr. W. D. Woodhead, Chairman of the Department of Classics, during an address given yesterday afternoon entitled "Plato as a Literary Artist." The lecture was one of a series given by the above department on Greek Authors. "Plato is the father of all heresies in religion and science, and at the same time the father of all orthodox," continued the speaker in affirming his statement.

Dr. Woodhead began his lecture by saying that in the history of philosophy it has seldom happened that a great philosopher has been a great literary artist. This, however, is true of Plato, the greatest writer of prose that the world has ever seen. Plato's work is known better now than in his own time and since then his influence has been very great.

He was born in Athens B. C. 428 and founded one of the earliest universities which was not destroyed until A. D. 529. This is one of the reasons why the writings of Plato have survived.

Influenced By Socrates
His surrender to the personality of Socrates was one of the greatest events in his life according to Dr. Woodhead. His dialogues are the testimonies of the influence of one great man upon another. Socrates was a familiar figure about the streets of Athens and had no testimony except of Aristophanes we should dismiss Socrates as a quack and an impostor. Yet he had fame outside his philosophy. He was noted for his frequenting of public places and was the happiest in the company of young Athenians.

To say that Socrates like great men was before his time, we cannot do, because he would still be before his time. But this is the man that influenced Plato. "It is impossible to distinguish between Socrates and Plato," said the speaker. The form which his works took gave great scope to the dramatic powers that he possessed. He had an extraordinary capacity for creating the proper atmosphere. The dialogues breathe the air of the 5th century B.C.

Perplexes Reader
"It must be admitted at the outset that those who approach the dialogues for the first time will find much to perplex and amaze them."

Canon Shatford At 'Y' Forum Tomorrow

Will Speak on Symbolism and Sacrament

The speaker at the Y.M.C.A. Forum tomorrow afternoon, will be the Rev. Canon A. P. Shatford, Rector of the Church of St. James The Apostle.

His subject will be "Symbolism and Sacrament," and his address will be the sixth in the series, "Pathways to Reality." The Forum Committee feels confident that Canon Shatford is peculiarly qualified to make a special contribution towards the subject upon which he has been asked to speak.

The meeting will be held at 8.15, in the Association Auditorium on Drummond Street.

Jobs Available In Mining Engineering

Students who expect to take the Mining Engineering course and would like to get practical experience in mining work next summer should see Professor McBride as soon as possible. Every effort will be made to secure employment for those who have no connection of their own with the mining companies, though first applications will be given first consideration in case it is impossible to place all. The importance of students getting all possible practical experience before graduation cannot be over-emphasized. Any department of

Seventh Plumbers' Ball Draws Mammoth Crowd

Two Numbers
From Revue
Are Played

Two musical numbers written for the Red and White Revue of 1930 featured the dance music dispensed by the orchestra at the Plumbers' Ball last night. One was "It Must Be Something," written by John Arnold, and the other "The College Stamp," written by Mortimer Weinfield.

These were played during the third dance and for one dance after supper, and met with considerable applause. The words to both pieces were written by Lawrence H. Freeman, but were not sung last night.

Children's Play Draws Students

"The Little Princess" Contains Amusing Scenes

PLOT IS SIMPLE

Norah Sullivan Popular With
Audience in Leading
Role

A glimpse of the antics, dances, and chatter, and above all, of the "let's pretend," of childhood was seen yesterday evening when "The Little Princess," a play for children, was given in Moyle Hall. The gay and amusing action seemed to be greatly appreciated by a large audience, composed mostly of students, for whom this performance was intended.

The Story
The play deals with the adventures of Sara Crew, motherless daughter of an army officer. Sara, blessed with a rich father and a capability for pretending, is called "The Princess" and is much fawned on by Miss Minchin, head-mistress of a girls' private school. When the family lawyer arrives bearing the news that Mr. Crew has died, all his money gone through the treachery of a friend, Miss Minchin's ideas change. Sara is given orders to run and a garret to sleep in.

The next scene shows the miserable attic room in which the girl sleeps. Though ill-treated she endures drudgery by her vivid imagination. Frustrated in all attempts to be merry by the sternness of Miss Minchin, she goes to bed. As she sleeps, a servant of a neighbour who pities the girl though he does not know her, brings rugs, cushions, a dressing-gown and slippers, to delight the girl on awakening.

The play terminates in the study of Mr. Carrisford, the kind friend. He is also the one who lost the money belonging to Sara's father. The money had been recovered and he wishes to return it. Sara is discovered and rescued from her slavery, to the indignation of Miss Minchin.

The Players
Norah Sullivan plays the leading role of Sara to perfection, both as a merry child and a romantic dreamer. Her voice is strong and pleasing, her gestures natural and effective. Constance Hobbs causes amusement as a

AMERICAN SPEAKS

Visiting Minister Addresses
Presbyterians on Monday

The Rev. William H. Foulkes, D.D., LL.D., Minister of the Old First Presbyterian Church, Newark, N.J., and Vice-President of the International Society of Christian Endeavor, will be in Montreal on Monday, and will address the students of the Presbyterian College at 5.30 o'clock on that date. The Rev. J. G. Potter, D.D., Moderator of the Presbytery of Montreal, will be present.

All McGill students and other friends of the College are cordially invited to attend this meeting. The meeting will be held in the David Morrice Hall.

Lectures on Burns

The Reverend A. F. Scott Pearson M.A., B.D., D. Litt, the recently appointed professor of Church History Homiletics in the Presbyterian College will deliver an address on Robert Burns and Religion under the auspices of the Literary and Philological Society of that college on Monday evening, at 8 o'clock. All McGill students and any others who are interested are invited to attend.

Distinctive Programs are Contribution To College Atmosphere

Groups of Balloons And
Class Banners Form
Decorations

BIGGER and better than ever, the seventh annual Plumbers' Ball was accorded a success last night in the ballroom and piazza of the Mount Royal Hotel. To the smooth, soft and satisfying symphonization of Izelle Aspley and his ten hearty stalwarts, over three hundred and sixty embryo plumbers and their gorgeously gowned ladies glided gracefully under the soft and subdued lights, which assumed many colours during the waltzes.

Six class banners, including the class of 1914, and two dance numbers from the forthcoming Red and White Revue of 1930, contributed to the college atmosphere which has always marked this annual function. Though usually held in the Engineering Building, inadequate accommodation necessitated its being held in a downtown hotel this year.

Distinctive Programs
Distinctive programs, drawn by A. Raymond, of first year Science were given out to the guests. On the front was a diagram of the First Plumber. The time of the dance was plotted by a curve. The border was one of jointed piping. The patrons and committee suiting Engineers and Steam-Fitters. Favors typifying the spirit of St. Valentine were distributed to the guests at supper time, which was served in the Piazza at midnight. Two large clusters of balloons were placed in the Ballroom. Great credit is due to the executive of the Science Undergraduate Society and the Ball committee, who forgot nothing to make the evening a success.

Patrons
The Ball was held under the patronage of Sir Arthur and Lady Currie, Dean and Mrs. H. M. MacKay, Professor and Mrs. C. V. Christie, Professor and Mrs. E. Brown, Professor

Library School Has B.C. Branch

Coast University Co-operates
For Summer Course
Like That Here

With the co-operation of the University of British Columbia, a summer Library School session will be held this year by the McGill School in Vancouver. This will be similar to the regular course given here every summer. This announcement was made recently by the authorities.

This extension of the McGill Library School's work has been made possible by an increased grant of \$54,000 from the Carnegie Corporation, to be given over a three-year period starting this year. McGill is the only university in the Dominion to offer a library course in the summer.

Mrs. Carter to B.C.
Mrs. Mary Duncan Carter, assistant director of the McGill Library School, will be in charge of the course in British Columbia. Lecturers will include, in addition to Mrs. Carter, John Ridington, librarian of the University of British Columbia; E. S. Robinson, librarian of the Vancouver Public Library, and Miss Nora Bateson, reference librarian at the University of British Columbia. Miss Grace Reynolds, secretary of the McGill Library School, will assist in the executive work.

Dr. G. R. Lomer, McGill librarian, will be in charge of the summer library school course given at McGill. Both summer courses will start July 22 and end August 9th. Students passing the courses will be given certificates showing that they have attended a school accredited by the Board of Education for Librarianship of the American Library Association.

Tea Inaugurates International Week

Sunday ushers in International Week at McGill. The opening function will take the form of a tea, which will be held tomorrow afternoon at 4.30 p.m. in Strathcona Hall, to which both men and women students are invited. A musical program will be presented. At 7.30 o'clock, a discussion of the subject "Prayer" will take place in which those who are genuinely interested are privileged to take part.

Klein And Collard Contend World Is Going To Dogs

REPRESENTATIVES of the McGill Debating Union Society will oppose the Knight's of Columbus Public Speaking Class at the Columbus Forum tomorrow afternoon. A. M. Klein, Arts '30, and B. G. Collard, Arts '31, will present the affirmative side of the proposition, "Resolved that the World is going to the dogs." Their opponents will be D. Archie McDonald, B.A., and J. Leo Keohan, of the K. of C. upholding the negative.

The judges will be the Honorable Mr. Justice E. Fabre Surveyor, John T. Hackett, K.C., and J. B. Taylor, M.A., formerly of Queen's University clubship debating team.

The debate will be broadcast over the station CKAC, in addition to which there will be a broadcast of musical numbers.

Research Council Awards Listed

Graduate Science Students
Eligible For Fellowships

TO STUDY ABROAD

National Body Offers \$4,700
in Bursaries and
Studentships

Bursaries, Studentships, and Fellowships to a total of \$4,700 are offered by the National Research Council of Ottawa to graduates of high distinction in scientific study, to those who have already done some original graduate research in science, and to those who have shown capacity for such work. The largest of these awards is the Ramsay Research Fellowship, tenable in Great Britain, and of the value of \$1,750. The winner of this scholarship is eligible for re-appointment for a second year.

The general regulations covering the awards are as follows: "These bursaries, studentships, and fellowships are intended, not to facilitate attendance on ordinary collegiate studies but to enable students who have passed through a university curriculum and have given distinct evidence of capacity for original research to continue the prosecution of science with the view to aiding its advance or its application to the industries of the country. Evidence of this capacity is strictly required, this being the main qualification. The most suitable evidence is the presentation of a research already performed."

The Principal made the announcement of these awards yesterday, and explained that further details could be obtained from the registrar. If an application is to be filled out it should be mailed direct to the National Research Council, Ottawa.

SEAT SALE FAST FOR "THE WITCH"

First Local Presentation of
Coming Play

Over one quarter of the total number of tickets available were handed out yesterday when reserved seat distribution for the Players' Club production, "The Witch" began. The waiting line was composed mostly of students, though the sale to people outside the university was greater than is usual for the first day of sale. "The Witch," a tragedy by Hans Wiers-Jenssen, was successfully presented in New York, but was considered too extensive to go on the road. Thus the production in Moyle Hall will be the first time Montreal theatre-goers will have an opportunity of viewing the play.

Addresses Physical Eds

"Current Trends and Problems in Physical Education" will be the subject of Dr. Jessie P. Williams, who addresses students of the M.S.P.E. this morning at 10 o'clock in the R.V.C. common room.

Summer Work For Metallurgists Available Now

Openings are now available for students who wish to obtain work in metallurgical plants during the summer. All students who intend to enter the course of Metallurgical Engineering should apply to Dr. Stansfield without delay.

Plant Diseases Are Harmful To National Trade

Canada Has to Struggle to
Market in Apples and
Potatoes

DIFFICULT START

Dr. H. T. Gussow, Dominion
Botanist, Tells Sigma XI
Society of Work

"On my arrival in Canada I was given a small bare room for a laboratory, no microscope, half a stenographer, and but \$2000 to buy my very expensive equipment," said Dr. H. T. Gussow, Dominion Botanist, in commencing his address on "Warfare with plant diseases in Canada." The speaker told of his first depressing experiences in the new continent and what wonders had been accomplished in this comparatively unexplored field.

The economic aspects of fruit and plant diseases are very vast, said the speaker, and the effect of a fruit blight upon a country's commerce cannot be over estimated. When Dr. Gussow came out 20 years ago, he was soon confronted by his first case by the appearance of a bad disease in Newfoundland's potato crop. An Act was drawn up and passed preventing the import of potatoes from Europe, who suffered very badly from this blight.

The United States, which wished to prevent the import of Canadian potatoes, sent agents to investigate the conditions in the Maritimes. This would have had the desired effect had not Dr. Gussow been sent on a similar errand to the States. The disease was found to have originated in Maine, and to be rampant in the New England states. Canada then took stringent measures to eradicate the disease and to inspect thoroughly all potatoes before shipment. The results are that Canadian potatoes, and especially Prince

(Continued on page four)

Urges Women Coach Women

Best Able to Understand
Weaknesses, Says P. E.
Professor

That women are more competent than men to coach the athletic activities of their own sex was stressed by Dr. Jesse F. Williams A.B. M.D., professor of Physical Education at Teachers College Columbia University, speaking before the Quebec Physical Education Association in the Mount Royal hotel last night. In support of this statement, the speaker pointed out that women coaches understand the weaknesses of girls better than male coaches do.

Time and place play a leading role in determining the kind of athletic activities indulged in by human beings and especially those of women. A significant change as to the place of women in athletics has become apparent more than ever during the last few years. Girls are showing more self expression than formerly due to the fact that the ancient idea that men alone had freedom in expression has been shattered.

Today women have the idea that they are as competent to engage in games such as hockey as men are. That this is not so is the belief of Dr. Williams since women are biologically different from men. An example of this was pointed out by the fact that women as a rule have wider hips and a lower centre of gravity than men. Because of the latter fact a girl should not indulge in strenuous bar exercises.

Athletic Training for Masses
The main point in women's athletics is not to become proficient in a special kind of sport at the expense of vitality but to develop the internal organs such as the heart. Physical educators, both in Canada and in the States are striving to provide athletic training for the mass rather than to develop small perfectly trained teams.

Book Exchange Pays Again Today

A further and final opportunity will be given to the many students who failed to claim cash owed them by the Book Exchange next Monday afternoon, from 4 until 5.30 only. A list of creditors will be published in the Daily on Monday morning. Receipts must be produced.

Dr. E. Thomas To Be Preacher At Church Service

DR. Ernest Thomas, of Toronto, Associate Secretary of the Board of Evangelism and Social Service of the United Church, will be the preacher at the University Church Service, which takes place tomorrow at 11 o'clock, in Moyle Hall. His subject will be "Christian Students and the World Order." The Rev. R. K. Naylor, of the Diocesan Theological College, will conduct the service.

The choir will be composed of students, and those who wish to assist in this respect are requested to assemble in the Men's Common Room, in the Arts Building, at 10.45 a.m. Arrangements for this service have been made under the auspices of the Student Christian Association.

McGilliad To Be Published Soon

Will Appear About Next
Thursday or Friday

PROGRESS MADE

To Contain 12 Pages—Second
Issue to Come Out
in March

According to an announcement made by Al Watt, President of the Arts Undergraduate Society, "The McGilliad," which the executive hopes will in the future be the literary magazine of McGill, will make its first appearance on the campus either next Thursday or Friday. There will be another issue this session about the middle of March.

The two present issues, Watt explained, are in the nature of an experiment to discover, not whether such a publication will sell around the University, but whether it is sufficient evidence of literary activity among the students to warrant its continuance on a subscription basis. Should this experiment prove successful, it is the intention of the Arts Undergraduate Society to amend the constitution to provide for the continuance of "The McGilliad." The retiring executive will, it is proposed, be empowered to appoint next year's editor and business manager, the editor appointing his own staff.

The issue which will appear next week contains 12 pages. There are two articles of especial interest; one written by Dr. C. W. Hendel, of the Department of Philosophy, and the other contributed by Dr. Stephen Leacock written in his usual humorous vein. The remaining articles and poems were contributed by the student body.

The magazine may be obtained for 20 cents at the offices of the janitors of the different buildings. The money from the sale of the copies will be used to defray publication expenses incurred, as there will be no advertising. Next year it is hoped it will be possible to sell enough subscriptions to make the magazine self-supporting.

Monthly Meeting of Newman Club Tomorrow

The regular monthly meeting of the Newman Club of McGill University will be held tomorrow morning, at Congress Hall, adjoining St. Patrick's Church, after the special mass for the McGill students at 9.30. All members are cordially invited to be present.

Deliberateness Is Basis Of All Marriage Laws

Society Has Learned That
This Is Wise, Says
Dr. E. Thomas

RESERVE IS WISDOM

Advices Gradual Removal of
Conventions as Intimacy
Increases

The wisdom of reserving the higher expressions of comradeship for the supreme occasion, was urged by Dr. Ernest Thomas in the course of a talk on "Christian Marriage and Before" to a gathering of men and women students in Strathcona Hall yesterday. Conventions, like outposts in an army, should be removed one by one with the increase in intimacy, if these gave way in advance to casual acquaintances, then the supreme expression when it came would be out of place.

"Society has learned that it is in the interests of life to ensure a certain amount of deliberateness," stated Dr. Thomas. "All the laws of marriage are built up on this." When one was married and the Christian ceremony was performed, this would be recognised by the community. It would not be a contract between the man and woman, it would be a contract between the community and the man and woman as a joint personality.

Dr. Thomas raised the question of comradeship before marriage, when economic conditions did not allow the regular family life to be established. He believed that Jesus would not have censured such a thing; there was no case on record of his ever having censured such a thing. But he believed that Jesus would have asked such questions as: "Was this the occasion for such supreme comradeship? In his sober moments, had the man regretted his actions? Was he quite sure that he did not wish this had not happened?" For the supreme expression was more than an incident in a person's life; something happened which left things very different.

Catholic View of Marriage

According to Dr. Thomas, the Roman Catholic Church never said that the service in the church was the sacrament of Christian Marriage. No body was able to marry the man and woman. They married each other; the minister was merely a witness. When they made that resolve, and there was complete union of body and soul, then they were married from that time on. There would be a constant growing of strength of purpose and richness of life.

Soon the man and woman would find

(Continued on page two)

Tells Of German Spiritual Attitude

Eleanor Markell Speaks on
Novel at Forum

"The New Spirit of Germany As Expressed in the Novel," will be the subject of discussion by Eleanor Markell at the People's Forum tomorrow afternoon. Miss Markell will speak from personal experience in that country.

There has always been much futile discussion on the subject of who won the war, but there appears to be little doubt as to who gathered the spiritual spoils. On this account Miss Markell's address should be very interesting. During the last eight years the speaker has gained an increasingly large following by her unique literary lectures. During the present season her audiences have filled the halls of New York, while her analysis of current literary trends in Europe have caused unusual appreciation in the press throughout the country.

Professor Reiley Gives Music Lectures

Beginning this morning at 10 a.m. when Professor H. E. Reiley will give the first lecture, a course of ten lectures is to be given on the "Science of Music and Musical Instruments." The course which will be delivered by Professor Reiley is being held in the Physics Building. All undergraduates and graduates interested in the subject of music are invited to attend.

Rum-Running is Topic

"Rum-Running" will be the subject under discussion at the meeting of the Saturday Night Club which takes place this evening, at 8 o'clock, in the Secretary's Office in Strathcona Hall. Dr. Ernest Thomas, of Toronto, will be the guest of the Club on this occasion.

Educational Radio

RADIO broadcasting was heralded as another great factor in the education of the people. We will not deny that it has not found itself in the class of educators, for there is a move to take up on this continent what has been the vogue in Europe for some time, namely the broadcast of school lessons in the elementary system.

Such aspirations may meet with a setback in this country for two reasons. First, while there are signs which show that moves are being made for a national concern in this matter, at present there is a system of networks which are not co-operative, and it must needs be that a single system be in operation for any successful attempt. Second, the wide expanse of our Dominion would mean that there would be some great difference between the hours of such lessons in Halifax and Victoria. This could be overcome by having the broadcasts so that they were afternoon assignments in the East and morning ones in the West, but there is a definite atmosphere of the morning curriculum which could not be transferred to the afternoon. And to add to these two is the fact that broadcasts could not be called national if there was not some inclusion of the French-tongue.

Compilers of radio programmes have before them the potent question of romantic or rational. At present the emphasis is upon the romantic. To be constructive and educational radio must not give to the public what it wants, for then it would be playing down to the lowest common denominator of its audience. It should rather pay the public the compliment of giving it something slightly better than it thought it liked. By the selections that are broadcast now we do not think that this is the present day trend.

We would point out that there is a priceless opportunity that still awaits broadcasting, an opportunity of stimulating a factual outlook on life by every person in the land. In that sphere it would indicate leadership. The negative virtue of denying the public vulgarity is so obvious a principle that it scarcely deserves the limelight of publicity. Broadcasting has the splendid chance to help us choose our factual future. Then it would be the leader in the class of educators.

The Slipstick Method

THE slide-rule is the engineer's most common instrument for performing rough calculations. The plumber can take a large and complicated expression, make a few passes on the "slipstick," and produce an answer in a moment. But that product is correct to three figures only; beyond that it is inaccurate. The slipstick method gives an approximate result with a minimum of time and effort but it remains an easy substitute for more laborious and exact methods.

The slipstick method is only too common to college men. In attacking his work and problems the average student tends to follow the path of least resistance to general and approximate conclusions. Yet in the years at college, unpressed as he is by the necessity of earning his living, he is offered an excellent opportunity for the development of systematic and exact habits.

The student in general fails to seize this chance. His diction is slovenly and no better than that of John Citizen, and his spelling and grammar are slipshod, as examiners know only too well. His lecture notes are as a rule unintelligible to anyone but himself, and sometimes he himself is confused. Campus activities show signs of

the lack of attention to details which are the inevitable result of such an attitude. The man who goes into business without the benefit of a college education early learns the value of method and of accuracy even in trifles. The man who has passed an easy four or five years at college, with only himself as judge of his actions, finds it necessary to cast off slovenly habits of several years of the most formative period of his life.

Cold Facts

WHILE the host of delegates representing the five great maritime powers of the world have been daily parrying with each other in the Royal Palace of St. James's to solve the problem of naval disarmament, the British Admiralty has stolen a march on the conference by announcing that ice cream plants with air-cooled compressors are to be installed on all battleships and aircraft carriers in the Mediterranean fleet and all new cruisers when commissioned.

Though Henry L. Stimson and other delegates so far abstained from comment, the news has created considerable stir. The Daily Telegraph naval correspondent, Hector Bywater, for instance speaks of this "wild policy" and adds, "I fear the issue, for the project to equip our battleships with ice cream gadgets will corrode the amity of nations. How can Washington be content with parity if Britain's navy has ices, too? How can she trust the British Admiralty if such subtlety is at work?"

And speaking from the domestic standpoint he adds: "The navy is going to the dogs again. Old salts remember yet with a shudder of horror that the Admiralty was looking kindly on jam and thought well of marmalade. Some hold that the navy has never been the same since. One piece of gourmandization has led to another. But the last is the worst."

We hope that these ice cream gadgets will not freeze up the works of the Conference. And who said that Britain was not making progress?

No Holds Barred, But

John Longden, the hero of Eitree's new talkie film, "The Road to Dishonour," must not kiss the heroine, Miss Anna May Wong, by order of the British Board of Film Censors.

He may sit at her feet, sing her a love song, touch her hand with his lips; even clasp her in his arms. But kiss her, no.

And all because Miss Wong is really Chinese. Were she a white girl made up as a Chinese, John could kiss her to his heart's content. But the Film Censors prohibit what is called "parti-coloured kissing." And so . . .

The censors, sick with Nordette's, (But don't you care, dear Anna Wong), Have banned you coloured osculaties . . . Censors, you know, are never wrong.

Your love scenes will be queered and puncheless; But don't you worry, Anna Wong. Our movie fans are not quite hunchies . . . They know where kisses should belong.

You still may do some goo-goo eyeing And hold each others squeezing hands. Just coo, coo, in his strong arms lying. Or hug him hard where'er he stands.

You lips and his can sidestep meeting And yet be perilously close. Why then regret a kiss that fleeting Or that your nose can't touch his nose?

What is a kiss but honey-sipping? Contact of skin must be presumed. Soul kisses call for lengthy liping. When love is beautifully bloomed.

If kissproof rouge your lips does cover . . . Thickly of course, sweet Anna Wong; And glue or gum those of your fover, You'll seem to kiss but won't do wrong.

—Yan-Phou-Jee—

A Lesson From Chicago

By Ernest Pitt

In view of the distressing news which the newspapers have furnished recently regarding the financial situation of Chicago, it is perhaps a good moment for cities like Montreal, which have also at times in the past known something of the evil effects of mismanagement, to give a little attention to the situation of the business capital of the United States and see if it has any lessons to offer us.

I do not think that any good will come of seeking consolation from the knowledge that there are other cities that are far worse off than ours. Even if Montreal were in every respect the best managed city in the world, it would still be the wiser plan to be constantly on the look out for opportunities of improvement, and to take lessons from the misfortunes, as well as from the successes of others.

There are many who look back to the thrades of Mayor Thompson against His Majesty King George as well as his attacks on everything that savored of giving a square deal to Great Britain and British interests in the teaching of history and other subjects in Chicago schools; and who see in the present unhappy state of affairs a just retribution for Chicago's administration. The best that we can

derive from that line of thought, is the lesson that the sole business of a civic administration is to administer the city and leave outside issues alone. The situation of Chicago is well known. Taxes for 1928 are not collected; 40,000 employees have not been paid their January salaries and wages; employees, including firemen and police, are being asked to accept "tax-anticipation warrants" instead of cash payment; banks are refusing to advance money to the city because of lack of faith in the administration. And this, in one of the greatest cities of the United States, one frequently referred to as the commercial capital of the Union—a status frequently claimed in Canada for the city of Montreal. Happily, there is no reason to fear any such condition arising in Montreal in the present generation.

One passes over financial difficulties which arise sometimes in small towns and rural municipalities. Commissions are sometimes organized to help them out. But when a city like Chicago with a valuation of four and a quarter billion, a population of nearly three and a half million and a revenue of \$228,000,000 each year gets into such straits, it is difficult to see any other way out than to let the citizens, who have allowed their city to drift into trouble, pull it out again as best they can. Montreal with a population of 1,100,000 must get along with \$38,000,000 of revenue.

For Montreal citizens, with civic elections looming in the near future, the moral is—eternal vigilance is the price of liberty. A city like a nation, gets the government it deserves. The best way for the residents of any city to warn their civic administrators that they are being closely watched, is to turn out election days and register their votes en masse. It is particularly important that the polls covering business, financial and professional interests should show a heavy vote, so that the city's administrators may know that the property owners who provide the bulk of the money, are watching the big moves of the city administrators.

Collegiana

An educated female vs. banditti—poor banditti. (The editorial is from "The Daily Tar Heel.")

IF THE LADIES GO TO WAR

A recent item in the daily press provides food for thought for those who have been engaged in the semi-serious battle in the columns of the Tar Heel over the value of the female in general, and the species Co-edditus in particular.

According to the report, a Smith College girl was walking on the campus, when she was asked the way to the President's house. Almost before she was able to answer, she was bundled into an automobile, blindfolded and whisked away to a remote part of town.

All this is according to Hoyle, and the best detective fiction standards. But what happened after that you won't find in the books—even authors whose imaginations are of the wildest. For truth, as has been said once or twice before, is stranger than fiction.

Our college girl, finding herself in the hands and stronghold of her captors, was not abashed. She straightway proceeded to argue with the abductors, and succeeded in convincing them that she ought to be set free, holding out such threats as the undesirable publicity sure to spread quickly, which would result in a widespread hunt, and so they let her go.

Now the point in all this is clear. The girl obviously had brains, and used them. And yet, all ye writers of the Open Forum, she was a college girl. It must be admitted, then, that there may be, and (whisper it) in fact that there are, girls who attend college and still have a modicum of sense to pit against that of the occasionally not so dominant male.

An ominous silence has recently pervaded Spencer hall. Beware of the storm, scoffers and letter-writers, if that silence should break. Inevitably, like milk, curdles and becomes even more sour when forced to stand quiet for a period of time. And whether or not we admit that there are girls who can and sometimes do think, we have met some flauters of the skirt who had a right powerful, not to say interesting vocabulary of causes. Take care, collegiates of what you say to the Main Worry, or what you write about her sex in general. For Hell hath no fury like a woman scorned—or abducted.

Joe: "I'd give ten dollars for just one kiss from a girl like you!"
The Girl of His Dreams: "Oh, how terrible."
Joe: "Did I offend you?"
T.G.O.H.D.: "Oh, no; I was just thinking of the fortune I gave away last night."

Madly he clasped her in his arms. The tears trickled down her cheeks like rain drops on the petals of a beautiful rose. Longingly he gazed into her eyes.
"Darling," he said, "let me kiss those tears away."
And then he kissed her, and kissed her, and kissed her. But the tears still fell ceaselessly. He clasped her still more madly in his arms and drew her close to his manly breast.

"Dearest," he murmured, looking straight into her tear-stained eyes, "Can nothing stop those tears?"
"No," she sighed, "It's lay fever—but go right on with the treatment!"

"And is that the compliment you had to tell me, that I have pretty knees?"
"Well, under the circumstances, that's the highest praise I can give you."

Next Week At Local Theatres

AT THE PRINCESS

The talking, singing, and dancing picture, "The Phantom of the Opera," will continue at the Princess theatre up to an including Monday night next, February 17, after which the theatre will be closed for one day only, re-opening on Wednesday, February 19, with the new Northern Electric sound equipment, and a giant screen.

"The Phantom of the Opera" features Lon Chaney, Mary Philbin and Norman Kerry. Woven into the plot of the story which is laid in the Paris Opera House, are scenes from "Faust." There are presented in full realism with color and music. Attractive short subjects and a comedy are included on this program.

AT THE ORPHEUM

Wall street with all its intrigues, plots, counter-plots, its gains, its losses, its hopes and its despairs are found in the feature picture, "Wall Street" at the Orpheum until next Friday. Half Inco and Alleen Pringle are featured in the leading roles.

The plot centers about a captain of finance who started life as a humble steel worker. By overpowering energy and a policy of utter ruthlessness, he forces his way to the top of the financial world. The plan he lives by is to take everything you can get in the world and if it comes from an enemy it is so much the sweeter. Not until he is humbled to the dust by woman he loves does he see light. Short subjects and a comedy are among the added attractions.

Deliberateness Is Basis Of All Marriage Laws

(Continued from page one)

that there were two wills, two ways of thinking, different moods, and each would not always be at his or her best. If there was no inward bond there would be danger of a separation. "Hence, I often say that there is no divorce problem but a marriage problem," said Dr. Thomas.

Duty to Children
The personalities of the man and woman once joined, there would be the problem not only of the present generation but of the future one. They would have the problem of helping their children. "It is murder to impose life and opinions on children," Dr. Thomas said. "If this is done, as far as personality is concerned, the child is dead."

Soon the parents would become "reference libraries." Finally the parents should renounce the children completely, and be willing to let them lead their own lives according to their own desires. If the father and mother were wise they would say "God Bless You" and let them go.
"There is the real Christian Marriage program, it is full thrills," concluded Dr. Thomas.

Semi Annual Meeting of the Students' Society, March 19th, 1930—5.00 P.M.

Red and White Athletes Face Busy Program Over Weekend

Red Cagers To Oppose Varsity Squad Tonight

McGill Team Has Chance to Strengthen Intercollegiate League Lead

DOUBLEHEADER

LOCAL cage fans who wend their way into the High School gym tonight will be treated to an interesting card of basketball. The McGill senior hoopers are slated to take on the University of Toronto quintette in the feature tilt of the evening at 8 o'clock. The curtain-raiser of the evening will be a battle between Coach Van Wagner's second stringers and the powerful Central Y outfit, which will start at 6 o'clock.

Despite the fact that the Red seniors are at present reposing gracefully at the top of the Intercollegiate circuit, they have not allowed overconfidence to enter their work. The McGill coach put his men through several grueling workouts during the past week and the manner in which Don Young and his scarlet-clad hoopers were covering the gym floor at practices argues well for the Red and White.

The Varsity seniors, following their defeat by the Redmen at Hart House last week are hopeful of reversing the tables and returning to Toronto with a win over the locals. They will have a real task on their hands for the Redmen seem to have reached the peak of their form and will be out to stretch themselves at the top of the ladder.

The McGill team will be intact for tonight's clash with the Queen City cagers. Young, Small, Faulkner and Weiden make up a powerful string of front line men whom the Red cage mentor can send in against the Blue. Four hard-working defencemen can be counted on in Rice, Peiker, Calhoun and Moore.

O'Leary, captain of the Varsity quintette will probably start at centre for the visitors flanked by Horton and Davey. Curry and Sakler are the logical choices for the guard positions. Coach McCutcheon has ample relief material to send into the fray on short notice. Riggs and Sniderman are both speedy forwards and can handle themselves well on the floor. Wood and Lock are the two relief guards who complete the lineup for the Blue.

Arts Take Tilt From Plumbers

Cagers Capture League Lead by 23 to 19 Win

A number of Science basketballers could not have enjoyed themselves at the Plumbers' Ball last night after tasting defeat at the hands of the Arts squad in a closely-contested tussle at the Montreal High gym last night. By virtue of this win Arts goes into the undisputed leadership of the Inter-Faculty Basketball league while the plumbers hold down the second position.

The game was close and exciting throughout and it was only in the latter part of the second half that Arts took a big lead which was almost overcome when the Plumbers made a determined bid to equalize in the dying moments of the game. Science scored three long shots in quick succession but the whistle sounded with the Arts cagers leading by four points.

Science started the scoring when Mills scored two long shots in quick succession. The game from that point on was a nip and tuck affair with Arts holding the edge in play. The half ended with Arts leading by two points.

The beginning of the second half was a repetition of the play of the first half. Near the middle of the half the embryo B.A.'s displayed the form which has characterized their play during the season and took a big lead which not even the late Science rally could overcome and the game ended with the Arts team leading 22 to 21.

Junior Hockey Today

There will be a game today at 2 o'clock against M.A.A.A. and the following must be on hand by 1:30 p.m.—McHugh, Bell, Johnson, D.S. Haines, Calder, Johnson, G. H. Bbitt, Newton, Hunt, Mahaffey and Rubin.

CHANGING THE SUBJECT

First Husband—Are you and your wife happy?
Second Ditto—Oh, very happy! But let's talk about something cheerful!
—Answers (London)

UP TO DATE

Slats—Did you meet any stage robbers while you were out west?
Plats—Yes, I took a couple of chorus girls out to dinner.
—Utah Humbug.

The best way to influence a man is to let him see the influence of his own actions.

Sturdy Guard

Bob Calhoun, one of McGill's four reliable defencemen who will take part in the intercollegiate cage fixture against Varsity at the High School tonight.

City Basketeers Take On Central

Both Teams Vastly Improved Since Last Meeting

MacLEAN TO PLAY

WHEN the McGill city league and Central "Y" senior squads met at the Montreal High floor tonight for their second meeting of the year, Montreal basketball fans will see two of the most improved quintets of the Senior loop.

After losing all their tilts at the beginning of the schedule the Drummond St. basketeers have made a comeback to win two games in their last three starts and, are protesting the game which they dropped to the provincial champion M.A.A.A. hoopers. The Redmen hold a victory over the "Y" outfit whom they defeated in the first game of the season. The McGill seconds have shown great improvement on their trip to Sherbrooke where they gained impressive victories over the Sherbrooke "Y" and Bishop's College quintets.

On the trip to the Eastern Townships centre, two new men, Dixon and Costello were given an opportunity to display their wares and both found their names in the scoring columns at the end of the games. MacLean last year regular forward on the Intercollegiate squad has returned to the game and has been present at all the practices during the past two weeks. With Mac's return to the fold the forward line will be greatly strengthened. His ballhandling which proved such a revelation to college basketball followers last year and his display during the practices has shown that he has lost none of his old ability.

The Central squad have one of the tallest teams in the league and led by Kenny Grant it has proved one of the hardest teams in the league to beat. When defeated it was only by the smallest possible margin.

The game is scheduled to start at eight o'clock.

Today's Athletic Program

Old Girls vs. R.V.C. Seniors (Basketball)—M.H.S. gym, 12 o'clock.

Winter Outing Club—Montreal Ski Club, 3 o'clock.

McGill Juniors vs. M.A.A.A. (hockey)—Forum, 2 o'clock.

Norwich vs. McGill (fencing)—Union, 2:15.

R.V.C. Junior White vs. Macdonald (basketball)—Y.W.C.A., 2 o'clock.

R.V.C. Grads vs. R.V.C. seniors (hockey)—Hollow Rink, 2:30.

McGill vs. Y.M.C.A. (wrestling)—Ottawa Y.M.C.A., 8:30.

McGill vs. Y.M.C.A. (boxing)—Ottawa Y.M.C.A., 8:30.

Varsity vs. McGill (intercollegiate basketball)—M. H. S. gym, 9 o'clock.

Central Y vs. McGill Seconds (city basketball)—M.H.S. gym, 8 o'clock.

Norwich Fencers Here To Tackle McGill Experts

Annual Competition to Take Place in Union at 2:15

WIGGERS ENTERED

THE fencers will open their intercollegiate season with a match with the representatives of Norwich University this afternoon. The American university is sending a five-man team to take part in the contest. The exhibition will be held in the Union and is scheduled to begin at 2:15 P.M.

Each year, the McGill fencers look forward to the Norwich match with great interest, for they consider it to be an excellent step in their preparation for the Intercollegiate Assault. As the Assault is to be held just a week from to-day, the contest is expected to throw some light upon the chances the local men have of emerging victorious from the fray next week.

Last year, the McGill fencers journeyed to Northfield, Vermont for the Norwich encounter. The team, which was composed of McKergow, Brown, Desbarats, Henneman, and DeChazal, lost by one bout. McKergow is the only one of that team who will represent McGill this year. Coach Raimondi feels that his present aggregation is far stronger than any which he has developed for several years.

The coming of Herbert Wiggers to McGill bolstered up the fencing team considerably, for he had several years experience in intercollegiate competition while at the University of Michigan. Rumour has it that he won a championship in the Western Conference at one time. Since entering McGill last September, he has taken part in two international tournaments. He covered himself with glory in the tournament sponsored by the North Branch Y.M.C.A. last fall.

On the basis of his splendid performance at that time, he was chosen to represent the Province of Quebec in a contest against representatives of the Fencers' League of America and his efforts were crowned by great success. Wiggers is thought to be a strong contender for the intercollegiate title this year. He will be the Number 1 man on the McGill team.

Second only to Wiggers is Alfred McKergow, Captain of the B.W.F. and a veteran of many intercollegiate Assaults. According to the Coach, he is a stronger fencer than ever this year. At a recent meeting of the members of the team he was elected by acclamation to be their Captain. Harvey-Jellie, Number 3 on the team, has not had as much experience as Wiggers and McKergow; but he has done extremely well in the tournaments sponsored by the Fencing Club this year. Clay, who is Number 4, and Boissonault, who is Number 5, have been engaged in fencing for three years and the latter represented McGill in the contest against Norwich year before last.

The line-up for the contest this afternoon will be as follows:

Norwich	McGill
1. Leet (Captain)	1. Wiggers
2. Pendo	2. McKergow (Captain)
3. Jones	3. Harvey-Jellie
4. Lang	4. Clay
5. Batchelder	5. Boissonault

Grad Hoopsters To Play Today

Meet R.V.C. Seniors in M. H. S. Gym at 12

The McGill Old Girls will meet the R.V.C. Senior basketball team today at twelve o'clock in the gym of the Montreal High School in an exhibition game. This will be the first time that the Grads have appeared in a game this year and a large crowd is expected to witness the match.

McGill's squad leave next Thursday for Western where the Intercollegiate meet is being held and this is the last game in which they will appear in Montreal this season.

Last year's captain, Jean Snyder will be seen in action once again to-day. Jean was side centre on the team last year and is expected to make a good showing in the clash this morning. Eileen Peters, manager of last year's team will play defense. The complete line-up of the sextette is not known.

The R.V.C. line-up will consist of Captain D. J. Ross defense, Eve Carter, Defense, Merle Peden, Centre, Betty Craick, Centre, Winnie Chisholm forward, Janet Baillie, forward and Helen Smart, sub.

There will be no admission fee for the game and rooters are reminded that their support will be very welcome.

LET'S GO

SHE: Wait a minute, I've forgotten my lipstick.
HE: You've got it on—Lips.

Grad Star

Jean Snyder, captain of last year's basketball team, who will be seen in action today when the R.V.C. Grads meet the senior squad.

Grapplers Are On Ottawa Card

Six Men to Represent McGill in Bouts

WOLFE MADE WEIGHT

To-day at 1:05 p.m. the mat men entrain for the Capital to take on the Ottawa Y. aggregation. They are leaving not without hopes of returning the victors of the mat.

The following are the grapplers that will represent McGill:—Wolfe 122 lbs. Coplan 117 lbs. Guillianelli 123 lbs. Norwood 144 lbs. Randazzo 174 lbs. Rollit 174 lbs. There will be no heavy weight representing the red team in that class and it will not be till next week that they will be seen in action.

Wolfe the fast Mac mat man has interchanged with Coplan who ordinary grapplers in the 112 lbs berth. This change was made when it was discovered that Wolfe had trained down to that weight.

The red men are going up against some very stiff opposition and every man will have to use his full ability when on the mat. There are rumors around that the Ottawa ranks are strengthened by two Dominion finalists and by one Dominion Champion. However the grapplers have just finished two weeks of training and have had some workouts with some very good men in practice meets. Great things can be expected from all of them.

Coach Smith is entraining with the men and his presence is sure to strengthen the confidence of the red men in no small way. All the wrestlers must be down at the Windsor Station by 12:50 p.m. They must also be sure to bring all their own equipment.

Sport Notices

Senior Rugby

The Senior Rugby Proofs are at the Union in the care of Mr. Yates. All those wishing copies please write their names on the back of the proof that they like and state whether mounted, unmounted or mounted with names preferred. The cost of copies is two dollars (\$2.00) for mounted or unmounted and two dollars and fifty cents (\$2.50) for those mounted with the names printed at the bottom.

Athletics

Will the following students please call at the Athletic Manager's Office at once:—
L. Giovanna, B. E. Molloy, G. V. Helwig, D. H. Starkey, H. T. Hart, G. R. Van Diepen, W. Lovering, H. N. Church, D. Munroe.

R.V.C. Hockey

The Grads hockey team will meet the R.V.C. Seniors this afternoon at 2:30 in the Hollow Rink. The R.V.C. line-up will be:—
Hyke, Lambert, (Capt) defense; Kaye, Stanfield, Defense; Babs

Boxers' Fight In Ottawa Today

Coach Bert Light to Remain—Withdraws Resignation

TRUDEL RETURNS

The following boxers are making the trip to Ottawa this afternoon, leaving the Windsor Station at 1 p.m.
Kussner, Sampson, Bernstein, MacGregor, Porteous, Trudel, and Boyce.

A HARD week's practice has tuned up the McGill boxers into the pink of condition and they are all set to give their best in Ottawa this evening. Everyone is in fine shape and the team is leaving confident of victory. Kussner has been reinstated, and the return of Trudel to the 160 class makes McGill's chances for today, and the Intercollegiate next week-end, a great deal brighter. Trudel is being taken to Ottawa this afternoon in order that he may see some real action before his elimination bout with Greenblatt next Tuesday.

Coach to Remain

Besides the return of Trudel and Kussner to the mitt game, it was learned yesterday that Bert Light finds that he will remain in Montreal next year, and has withdrawn his resignation as coach of the boxing team. Needless to say a great deal of gloom that has been hanging around the ring circles lately has been dispelled by this good news, and now the mitt-men are all ready to go, and that is a spirit that will take some stopping.

Now that Kussner is back into the good graces of the University, Tannenbaum has to look for a place in the 118 pound division. He will fight an elimination bout against Sampson next Tuesday in conjunction with the Greenblatt-Trudel fight. However Sampson is making the trip to Ottawa this afternoon.

Ottawa Boxers Are Serious

The Y.C.M.A. at the Capital City are taking this meet very seriously and have rounded up some of the best boxers in the Valley to oppose the McGill boys. At the same time it is rumored that a couple of men from the Montreal Y.M.C.A. will also be on hand. With the Intercollegiate being fought here next Friday and Saturday this melee in Ottawa will have a definite bearing on the training of the red squad. It will give Bert Light a last chance to look the team over, do the necessary weeding out, and add the last minute touching up that is so necessary to a crack squad.

The Intercollegiate is sure to attract a large and enthusiastic crowd. Christmas is a time of rejoicing and gaiety, and comes once a year, but the Intercollegiate comes here only once in four. Things are certainly brightening up for the McGill boxers.

Junior Cagers Desire Revenge

Play Macdonald in Second Battle Here

R.V.C. Junior "White" team will meet the Macdonald College players today at 2 p.m. in the gymnasium of the Y.W.C.A. In the last game with the "Macies" the McGill girls came out on the bottom end of the scoring but the Macdonald squad will be playing at a disadvantage on the small floor of the "Y" and the Red and White should be able to reverse the results this afternoon.

This year McGill entered three teams in the City League, one Senior and two Junior. The schedule drawn up gave the "White" team little practice in the earlier part of the season and consequently they have not been able to do as well as their "Red" partners. They suffered another drawback early in the year when their best forward, Louisa Smart was moved up to Senior ranks.

This is the second last game that this team will appear in. On February 23 they will meet the Y.W.C.A. at the "Y."

Today's line-up will consist of,—Captain Marnie Allen, side centre, Janet Clouston, centre, Joy Oswald, forward, Eileen Fairbairn, forward, Margaret Dodds and Peggy Doull defense.

Queen's Play Y.W.C.A.

The Queen's women's intercollegiate basketball team have arrived in Montreal to play the Y.W.C.A. in an exhibition encounter at the Y today. Both squads are rated highly in Dominion cage circles and a battle royal is expected to take place when the

Light Sometimes Affects Reactions

Phenomena Are of Importance in Chemical Industries

THEORY EXPLAINED

W. R. Sawyer Spoke on Photosensitization and Chemiluminescence

The converse phenomena of photochemistry and chemiluminescence were discussed by W. R. Sawyer, of the graduate school, at the Chemical society yesterday afternoon. The former deals with the induction of chemical reactions by incident radiation and the latter with radiation emitted when a chemical reaction takes place. As important examples of photochemical reactions were cited: the industrial chlorination of organic compounds; the polymerization of such compounds as vinyl bromide; and the synthesis of formaldehyde from carbon monoxide and hydrogen.

The kinetics of photochemical reactions may be fairly well interpreted on the basis of Quantum Mechanics—that is to say one quantum is absorbed per molecule reacting, although it is necessary to distinguish between primary and secondary effects. Spectrum analysis enable the reaction to be classified as one of three types involving molecular dissociation; continuous spectrum, or the production of active molecular, sharp spectrum, or diffuse spectrum a combination of these. Both endothermic and exothermic reactions are known.

Industrial Interest
The latter are of particular industrial interest and sometimes involve very high quantum efficiencies. Thus, in the combination of hydrogen and chlorine to form hydrogen chloride at ordinary pressures, as many as a million molecules may react per quantum absorbed. A study of various inhibiting agents has given valuable data on the reaction mechanism.

Photosensitization of a reaction may be brought about by the addition of substances which show fluorescence under the incident light. Uranyl acetate has found extensive use for this purpose in polymerization reactions although the most important uses of photosensitizers has been in the photographic field.

At the conclusion of the lecture several interesting chemiluminescent experiments were performed, illustrating methods of oil analysis, detection of food adulterants, signalling and photosensitization.

Plant Diseases Are Harmful To National Trade

(Continued from page one)

Edward Island ones, are the finest in the world.

How Botany Helped Trade

Three other examples were given of how botany has rescued trade. A canker, which was affecting orchards in Oregon, suddenly attacked the apple trees of B.C. in order to maintain their market. B.C. growers had to cut down all infected trees and prevent all infected fruit from crossing the border. The huge expense involved was met by the results.

Rust is one of the greatest evils to plants for it harms both fruit and wheat. The speaker stated that the 14% which is lost every year of the fruit crop through rust is worth four times the whole fishing industry; and also that the cereals destroyed every year by rust amounted to \$25,000,000.

To convince the government of the great need for a research department was the first struggle, but having extracted \$50,000 from the Dominion, Canada has now the best rust research bureau in the world. After long and exceedingly interesting studies into the cause of this rust, which clung round the stalks of wheat, stunting their growth, it was found that germs were travelling from the southern crops and settling on Canadian wheat. The southern crops ripened sooner than northern ones, and the bacteria would in some cases travel 700 miles. By scattering dust over the crops the affect of the rust was lessened, but the only real cure is to develop a brand of wheat which will not be affected by this blight. So far research into this branch has been most successful.

Future for Trained Men

The latter part of the address showed the prospects of positions in this field and the training which was required. The grounding of all budding botanists should be plant pathology, because if students do not know the normal functions of plants they can not be expected to understand their abnormal ones. The speaker believes that there will be a bright future for well trained botanists; and he hopes that the public mind will be educated to take an interest in this very important subject, so that diseased fruit will no longer be exported from their country.

There's a story circulating about Providence, of the senior who took a bath and found two shirts he's lost in his freshman year.

—Dorchester Jack O'Lantern.

Seventh Plumbers' Ball Draws Mammoth Crowd

(Continued from page one)

and Mrs. J. W. Bell, and Colonel and Mrs. Wilfred Bovey.

Among those in attendance were representatives from the University of Toronto, Queen's and the Royal Military College, Kingston.

The following were present:

Ladies

Foreign Correspondence

The interest shown by national student organizations in other countries may be seen by their requests to correspond with members of the N.E.C.U.S.

Word has been received from the Students' Council of Guelph Agricultural College inviting the Executive to hold its fourth annual meeting in December 1930 at Guelph. Conferences have thus far been held at McGill, Toronto, Queen's, and the University of Montreal.

As a direct result of the second Imperial Conference of students which was held at the University of Montreal last September, it seems possible that Canadian Universities will be represented at the International Games which are being held at Darrastadt in 1930.

The love that passeth all understanding is in the movies.

McMaster Buildings Offered For Sale

U. of T. Has Options on Adjoining Land

Toronto.—(By Exchange Service)—“The land and buildings of McMaster University are for sale,” said Dr. H. P. Widdon, Chancellor of the university in an interview with “The Varsity.” He also intimated that he did not believe they would be used for apartment houses.

Both the provincial government and the University of Toronto have options on land adjoining their territory, but whether they might buy McMaster or not depends on the price they would be willing to pay. The Chancellor intimated that he did not consider the buildings suitable for a Women's Building unless expensive alterations were carried out.

With regard to the reason for the removal of the university to Hamilton, Dr. Whidden said that it was largely a matter of progress. If McMaster is to remain independent, if it is to progress in the future as it has since its foundation in 1887, it must have more land on which to build. “In Toronto we have less than two acres, while in Hamilton we will have ninety,” said Dr. Whidden. “Thus we shall be able to have larger theological seminaries, bigger buildings for the Arts and Sciences, more spacious dormitories and greater facilities for recreation and sport. In Hamilton McMaster will be able to grow bigger and better for the benefit of her students and the world at large, and that is the reason we are going there in September.”

Children's Play Draws Students

(Continued from page one)

very young child, and Lorraine How as one slightly older. Olive Ford cleverly assumes the accent of a cockney servant, while Betty Soward is convincing as the stern headmistress.

Among the males, Allan Wright in very short shorts amused the audience, and James Harvey was pleasing as Mr. Carrisford. The rest of the cast filled their positions well, and without exception could be heard throughout the hall.

The scenery and lighting were well arranged, especially in the second act. The play was under the direction of Miss Marguerite Strathy, and the scenery and costumes were by the class of English 13. This afternoon at 3 o'clock “The Little Princess” will be presented again for Montreal children.

Good Registration On Tour Assured

N.E.C.U.S. Travel Secretary Issues Statement

POSTPONE CAMPAIGN

\$50,000 Permanent Endowment to be Pushed When Business Improves

The Travel Secretary of the N.E.C.U.S. says he is assured of a good registration for next summer's tour exclusively for the student contemplating a visit to Europe, during the course of which five countries will be visited: Scotland, England, France, Holland and Belgium. The total price of \$42.25 covers all expenses during the 44-day trip.

Acting upon the advice of prominent business men, who are interested in the work of this organization, the N.E.C.U.S. decided that, owing to the recent stock market crash, it would not be advisable to commence the \$50,000 drive at present for the permanent Endowment Fund. But as soon as business conditions warrant it, the drive will be pushed.

— Notices —

Notices must be legibly written and be in the McGill Daily office before eight o'clock on the night previous to publication. Brevity is essential. Under no circumstances will notices be accepted over the telephone.

UNIVERSITY CHURCH SERVICE
A University Church service will be held in Moyse Hall, tomorrow at 11 a.m., at which Dr. Thomas will preach on “Christian Students and the World Order.”

INTERNATIONAL TEA
An International Tea will be held under the auspices of the S.C.A. tomorrow at 4:30 o'clock, in Strathcona Hall. A musical program is being prepared for the occasion. Both men and women are invited to this function.

At 7:30 o'clock, all those who are genuinely interested, are invited to take part in a discussion of the subject “Prayer,” at which Dr. Thomas will be present. This subject has been chosen as a fitting topic owing to the fact that Sunday is being observed as a Universal Day of Prayer by Christian student groups the world over.

SATURDAY NIGHT CLUB
Dr. Thomas will be the guest of the Saturday Night Club at their meeting which takes place this evening, at 8 o'clock, in the Secretary's office in Strathcona Hall. The subject will be “Run-Running.”

LECTURE ON KELVIN
“The Life and Work of Lord Kelvin” will be the topic upon which Dr. D. A. Keys will lecture in the Macdonald Physics Laboratory next Tuesday evening. This is part of a series of lectures on famous British physicists.

The lecture will be illustrated with certain apparatus in connection with navigation, for which Lord Kelvin was famous.

LIGHT AEROPLANE CLUB
On Monday at 8 p.m. Professor A. J. Kelly will give the second of his lectures on Meteorology. The club will also hold a special meeting at that time to ratify certain amendments to the Constitution.

HISTORICAL CLUB
The club will hold its next meeting on Tuesday at the home of Professor T. W. L. Macdonald, 1776 Queen Mary Road. Papers will be delivered on “The Russian Revolution” and “Fascism in Italy” by L. C. Carrol and E. P. Reid.

PRESBYTERIANS
The Reverend Wm. H. Foulkes of Newark, N.J. will address the students of the Presbyterian College at

Considers Plato To Be Founder Of Catholicism

(Continued from page one)

continued Dr. Woodhead. This is due to too much attention to detail. “If we can be patient, Plato soon makes us forget details.” As Plato grew more mature, the dialogues became more constructive.

Plato is one of the ancients who really possessed humour according to the lecturer. “It is his pishish humour which endears him to the world,” he continued. We encounter that famous irony of Plato in the dialogues in which Socrates contested with the Sophists. Plato was always ready to lead his listeners into a trap by his pretences.

Great Sincerity
Dr. Woodhead then went on to speak of Plato's sincerity in the structure of his writings. He pointed out that due to his supreme gift for expression no translation could be made without the language suffering. “It is Plato's intense sincerity which makes him so eloquent when he speaks of the things nearest his heart,” intimated the speaker. “His sublime passages have had an incalculable influence on the poets of all nations.” Behind all he says there seems to be an intense conviction of the truth and his simplicity of style makes what he utters all the more convincing.

INVITE STUDENTS

Speaker Tells of Personal Impressions of Russia

“My Personal Impressions of Russia During My Recent Visit,” is to be the title of a talk on current events at the next meeting of the Modern Book Review Club by Mrs. Alex Gauld which meets each Wednesday at the Mount Royal Hotel at 8:15 p.m. These lectures are open to students and questions and discussions are welcome.

The object of this club is threefold: it deals with World affairs, with any science connected with this study, and lastly, it tries to effect complete understanding between religions and different opinions on the subject of the institutions which control the behavior of humanity.

5:30 p.m. on Monday. All McGill students and friends of the college are invited.

ENGLISH SOCIETY
On Wednesday next B. K. Sandwell will address the society.

ARTS UNDERGRAD EXECUTIVE
If Captain Watt, First Mate McNaughton, Purser MacKenzie, and supercargo Alchin will muster on the poop deck at two bells in the first dog watch on Monday, the course of the goods shippe “Belle Poule” for the next few weeks will be plotted, and Nelson's Blood will be drunk.

(Note to landlubbers: One o'clock in the reading room of the Arts Building.)

NEWMAN CLUB
The Newman Club of McGill University will hold its regular monthly meeting on Sunday morning, Feb. 16th, at Congress Hall, 451 Dorchester St., West, after the special Mass for McGill students at 9:30 A.M. All members are cordially invited to attend.

Lost
A man's scarf. Coarse silk. Scotch knit in colour. Between Medical and Biological Buildings. Finder please leave either at Biological or Medical Buildings.

A silver Eversharp with a gold top in the Arts or Physics Building on Feb. 8. Finder please leave with Bill Gentleman.
